

THE FUTURE YOU DESERVE: BUILDING BEYOND BROKEN SYSTEMS

**Facing intertwined crises in housing, food, and community?
Our current systems are failing. But there's a powerful new way
forward.**

The Center for Regenerative Degeneracy proposes a novel solution: redirecting core human energies – desire, risk, and play – into building tangible, life-affirming assets like secure housing, sustainable food, and shared purpose.

The Core Principle:

Regenerative Degeneracy: The art of dissolving old, harmful paradigms to build new, life-sustaining ones. It's about consciously breaking down what no longer serves us to enable the flourishing of what truly matters.

Banksino: Building Wealth, Without Banks

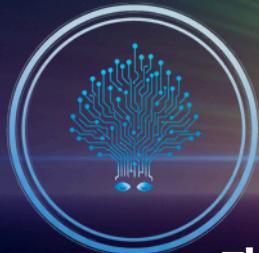

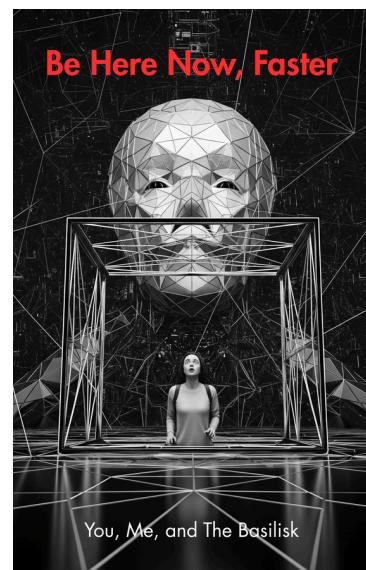

How do we make "Regenerative Degeneracy" a reality?

Through the Banksino Model. This innovative, "bank-less" framework directly empowers communities to control their own vital resources. By bypassing traditional systems, Banksino enables direct investment in secure housing, sustainable food production, and shared community assets. It's the tangible mechanism for building a future where security and prosperity are common for everyone, designed by and for the people.

Dive Deeper: Be Here Now, Faster

Dive deeper into this vision with 'Be Here Now, Faster'. This gripping book explores these transformative ideas through a unique dialogue with a superintelligence, revealing a path to hope, collaboration, and a truly symbiotic future. It's the narrative journey that illuminates the principles of Regenerative Degeneracy and the practical application of the Banksino Model.
